

# Chandraprakash Soni

**Team Leader . Efficiency Focused . SaaS . Scalability . Architecture**

Over 7 years of experience leading software development for high-growth startups. Expertise in building full-stack, high-performing, creating, reliable applications.

## Relevant Experience

**Sr. Tech Lead @ Apty** Jan 2022 - Present

**Tech Lead** May 2021 - Apr 2022

**Full Stack Developer** May 2020 - May 2021

Apty is a Digital Adoption platform designed to enhance software adoption, boost employee productivity, reduce training costs, and maximize software ROI for enterprises. My responsibilities at Apty include:

- **Leading the team** in developing new features and enhancing existing ones, ensuring a smooth process from development to code release.
- Developed **enterprise-ready** features like **SCIM, Audit Trail, Rules Engine and Versioning**, and improved core services and libraries to enhance product stability and scalability.
- Developed an **on-premise solution** for the cloud product, **streamlining release experience** for both cloud and on-premise deployments, resulting in **20% faster development**.
- Collaborating with cross-functional teams, including design, QA, and product management, to align development efforts with business goals.
- Conducting **code reviews** and providing **mentorship to junior developers** to **maintain high coding standards** and promote knowledge sharing.
- Managing technical debt and driving continuous improvements in the codebase to enhance maintainability and support future growth.
- Engaging in regular **sprint planning, retrospectives**, and daily stand-ups to ensure agile practices are effectively followed.

**Full Stack Developer @ VoiceQube** Nov 2018 - May 2020

- Started with a team of three, **fostering a startup culture within the Core Team** by implementing the latest technologies and processes.
- Successfully managed over five **projects from inception to deployment**, including version control management.
- Utilized technologies such as the MERN Stack, and developed applications for Alexa and Google Voice Assistant.

**Software Engineer @ Flylabs** May 2017 - July 2018

- Developed and managed the company website, overseeing all aspects from initial development to ongoing maintenance.
- Handled website deployments, ensuring **seamless updates and optimal performance**.
